ANTS/ CRICKETS/ EARWIGS... (Follow 1-3; 6-9)

FABRIC PESTS...(Follow 4-9)

FLEAS...( See Below)

ROACHES ... (Follow 1-9)

STORE PRODUCT PESTS...(See Below)

SILVERFISH...(Follow 1-9)

TICKS...(See Below)

## 1) KITCHEN & BATHROOM:

Remove everything from all kitchen and bathroom cabinets, drawers and counters. Do not forget the medicine cabinet, toothbrushes, can openers, toasters, etc.

Take items out of kitchen and bathroom and place on table/floor in another room and cover with a sheet.

**DO NOT WASH AFTER TREATMENT: Wash cabinets before not after!**

Washing cabinets destroys the effectiveness of the product and eliminate the results.

AFTER TREATMENT you may wash counter tops, stovetops and breadboards only. Please leave the cabinets alone; chemical will be in cracks, crevices and will not harm dishes/food.

## 2) DRAWERS:

Drawers must be emptied completely. If the problem persists in the bedroom areas ALL dresser drawers must also be emptied.

Remove everything from all kitchen and bathroom cabinets, drawers and counters. Do not forget the medicine cabinet, toothbrushes, can openers, toasters, etc.

Take items out of kitchen and bathroom and place on table/floor in another room and cover with a sheet.

### **3) CLOSETS:**

Clothing on hangers may be left in place, you can simply pull it to the center of the rack and cover with a sheet. We recommend lifting the clothing off the rack and placing them on the bed.

### **4) FURNITURE:**

Move all furniture from wall 2-3 feet. Pull the curtains up at least 5 feet. We need to treat all cracks and baseboards.

### **5) REMOVE ALL ANIMALS: \*\*MUST\*\***

Dogs, Cats, Birds, Reptiles, etc. Fish may be left in the unit; however, the filtration unit must be turned off and wrapped in plastic. The pump must remain off for 4-6 hours after treatment. (Please check with your local fish dealer regarding the lack of aeration).

**Bug A Bug Pest Elimination, Inc. will not be responsible for pets in the unit during treatment.**

### **6) WINDOWS/FANS:**

Windows, Fans, air conditioners and doors must be closed or turned off before treating.

### **7) KEYS:**

Make sure you have your keys & lock doors when we leave

### **8) TIME TO LEAVE:**

Leave your home for ONE (1) HOUR. After treatment you can ventilate all treated areas before reoccupying, by opening doors, windows or something similar for at least THIRTY (30) MINUTES to exchange inside with outside air.

### **9) UPON RETURN:**

Place items back in cabinets, closets and drawers. **DO NOT BE ALARMED IF YOU SEE INSECTS AFTER TREATMENT.** This will decrease as the insecticide takes effect. Condition should be all clear in 14-21 days.

### **FLEAS and TICKS:**

Remove all items from all floors and carpets (ie: toys, shoes, pillows, magazines, plants, stereo equipment, etc.) Except furniture. Place the pets' bed, sheets & blankets in dryer in Medium Heat for at least One (1) hour. Vacuum all carpets before treatment, then dispose of the vacuum bag in an outside trash container (to get rid of flea eggs).

**...FOR CATS and DOGS**, should be taken to the vet for a flea bath or treatment same day of service.

**WE CANNOT WARRANTY TREATMENT UNLESS THIS IS DONE:** Follow #6, 7 and 8 (**ALWAYS FOLLOW #5**)

**FOR STORED FOOD PESTS:**

Remove all infested cereals, grain, silk flowers and wicker products, spices, etc. Wrap infested products in plastic bags and throw in a trash bin. Follow #1,2,4,6,8 and 9 (**ALWAYS FOLLOW #5**)
